

3M™ Cavilon™ No Sting Barrier Film

Cavilon™

Take Comfort in Proven Protection

Cavilon No Sting Barrier Film is an alcohol-free liquid barrier film that protects intact or damaged skin from bodily fluids, adhesive trauma, friction and incontinence. It is clinically proven to provide up to 72 hours of protection from irritation due to incontinence. In fact, 3M has over 30 pieces of clinical evidence supporting the efficacy and cost-effectiveness of Cavilon No Sting Barrier Film—more evidence than any other moisture barrier or barrier film.

- Protects intact or damaged skin
- Sterile, non-cytotoxic
- Alcohol-free, sting-free
- Hypoallergenic

3M™ Cavilon™ No Sting Barrier Film

A completely alcohol-free, sting-free liquid barrier film that dries quickly to form a breathable coating to protect damaged or intact skin from bodily fluids, adhesive trauma, friction and incontinence. Cavilon No Sting Barrier Film is transparent, allowing continuous visualization and monitoring of skin at risk for breakdown. The unique formulation provides long-lasting protection. It does not transfer to, or interfere with, diapers or continence briefs possibly minimizing the need to change failed linens and associated products.

- Protects intact or damaged skin from bodily fluids, adhesives and friction
- Long-lasting, for more comfortable and cost-effective care
- Sterile, non-cytotoxic
- Alcohol-free, sting-free
- Hypoallergenic

Strong Clinical Evidence

3M sponsored the largest health economic study for incontinence dermatitis prevention and found that use of Cavilon No Sting Barrier Film three times weekly is as effective in preventing incontinence-associated dermatitis as products that require application after each episode of incontinence.* The same study found that a skin damage prevention regimen using Cavilon No Sting Barrier Film three times per week had a significantly lower total cost than other product regimens.*

* Bliss D, et al. An economic evaluation of four skin damage prevention regimens in nursing home residents with incontinence. *Journal of Wound Ostomy and Continence Nursing*. 2007; 34(2): 143-152.
