Step into unparalleled comfort with our line of Height Adjustable Exam Stools, a definitive choice for those seeking an exceptional seating solution. We've meticulously engineered our stool to blend functionality with captivating style to redefine healthcare seating. The body of the stool is constructed from durable stainless steel to ensure your investment will last for many years. Each of our stool bases is outfitted with premium, easy-to-clean antimicrobial upholstery that not only assures luxurious comfort and appeal but creates a hygienic environment by minimizing the risk of cross-contamination. For optimal plushness, our stool base has 4" foam that delivers consistent relief.

Additionally, we've equipped them with 2" caster wheels that supply straightforward maneuverability. You can seamlessly glide across your floors without leaving any marks behind. In order to deliver an adaptable stool, we've equipped our Height Adjustable Exam Stools with the ability to raise or lower to your desired height. This will enable you to maintain proper posture and help cater your seating position depending on the medical procedures or examinations being conducted. Though this may seem like an average piece of medical furniture, it's deceptively crucial. It will provide long-term comfort, hold up to daily wear and tear, and enhance your office's overall aesthetic.
