

# FOLDING PARALLEL BARS (7 FEET)

ADIME905-01

Step into a world of limitless possibilities for your physical therapy practice with our remarkable 7-foot Folding Parallel Bars. Elevate your rehabilitation sessions to new heights as these bars blend convenience and strength, providing an exceptional experience for therapists and patients alike. Crafted with precision, these width-adjustable Folding Parallel Bars boast double stiffening rails, ensuring unmatched stability and support throughout each exercise. With easy height adjustment through our screw knob and thirteen numbered height options, achieving the perfect therapeutic setting becomes an effortless endeavor.

We've built our parallel bars with heavy-duty square telescoping steel uprights to endure the demands of intense physical therapy use, guaranteeing utmost safety and ensuring it can handle up to 350 lbs. The second built-in height knob eliminates unwanted movement, fostering a smooth and controlled session. Additionally, each handrail is thoughtfully equipped with end bumpers, safeguarding the equipment and the surrounding environment. When you need extra space or the parallel bars aren't being used, you can easily fold them to a compact size and store them away. Embrace a world of limitless therapeutic possibilities with our 7-foot Folding Parallel Bars, engineered explicitly for physical therapy use.

## FEATURES

**Customization:** The width can be easily adjusted to suit user preferences and exercise requirements.

**Durable:** 1.25" one-piece stainless-steel handrails give patients a reliable grip.

**Adjustable:** Our bars feature screw knobs and thirteen numbered height options allowing for effortless customization of the height setting.

**Heavy-Duty:** The square telescoping steel uprights are built to endure the demands of intense physical therapy use.

**Capacity:** Our Folding Parallel Bars can handle up to 350 lb. accommodating various patients.

**Sturdy:** The built-in height knob eliminates unwanted movement, fostering a smooth and controlled session.

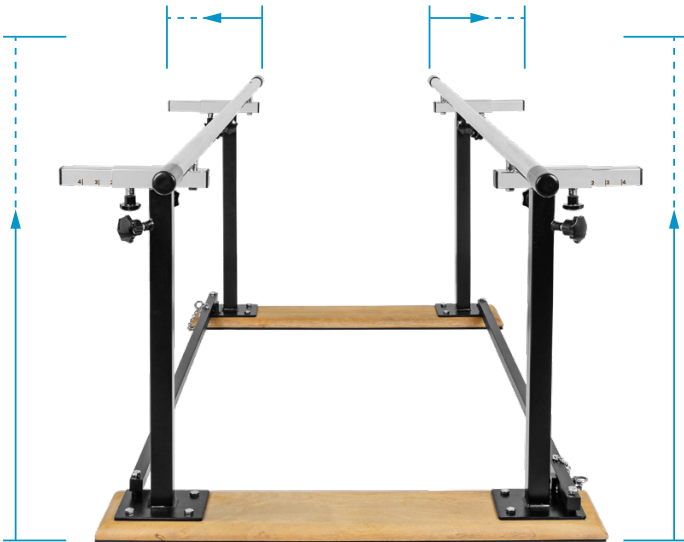

**Non-Marking:** Outfitted with end bumpers that provide a protective barrier that reduces the risk of snags or injury.

**Spacious:** An ample 7-foot size provides plenty of room for accommodating various exercises, offering therapists and patients more freedom of movement and versatility.
