

Biohazard Steel Step-On Trash Can 13 Gallon

ADIME992-13-R

When safety and compliance are the priority, our **13-Gallon Biohazard Steel Step-On Trash Can** delivers a professional-grade solution designed for the modern medical environment. Finished in a vibrant hue of red, this unit serves as an unmistakable visual indicator for infectious waste, ensuring immediate recognition and strict adherence to safety protocols. The heavy-duty steel construction provides a puncture-resistant barrier, while the integrated hands-free foot pedal allows for seamless, sanitary disposal without any manual contact. To streamline workflow, we've included internal bag clips that lock liners firmly in place, eliminating the frustration of sliding bags or exposed edges.

While larger, more industrial-style medical bins can often feel clunky and noisy in a quiet clinical setting, our design focuses on refined performance. We have integrated a premium rubber trim around the lid to act as a specialized buffer, ensuring a soft, muffled close that eliminates the harsh metallic clanging common in other models. This combination of high-visibility color, secure bag management, and noise-reduction technology makes it a more sophisticated and practical alternative for exam rooms and labs where space and professional atmosphere are at a premium.

Features

Sanitary: A heavy-duty steel foot pedal enables quick, touchless operation, which is essential for maintaining a sterile environment.

Secure: Specialized internal clips lock the liner firmly to the rim, preventing the bag from slipping or bunching.

Quiet: The lid is engineered with a premium rubber trim that acts as a buffer, ensuring a soft closure.

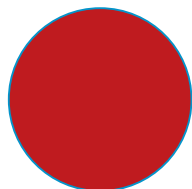

Durable: Constructed from high-grade galvanized steel, the body offers superior puncture protection compared to plastic alternatives.

Compact: This model provides a generous 13-gallon volume while maintaining a slim 16.5" width, allowing it to fit easily into tight exam rooms.

Vibrant: The exterior is coated in a red finish, providing a clear visual cue for biohazard disposal to ensure strict compliance with facility safety protocols.

Features

13 gallon
capacity

Red Finish

Provides a clear visual cue
for biohazard disposal

Foot Pedal

Enables quick, touchless
operation

Internal Clips

Lock the liner firmly to the rim,
preventing the bag from slipping or
bunching

Premium Rubber Trim

Acts as a buffer, ensuring a soft
closure

Rubber Feet

Provides added stability while
protecting floor surfaces

Specifications

Dimensions	25.03" H x 16.54" W x 17.05" D
Weight	27.93 lbs.
Material	Galvanized Steel, Rubber, Plastic
Capacity	13 Gallon
Color	Red
