WHITE, PLASTIC SANITARY NAPKIN RECEPTACLE

A single "Out of Order" sign during a busy shift is more than an inconvenience, it's an expensive, frustrating disruption that leaves a lasting negative impression on your guests. The primary culprit? Flushed hygiene products. The Alpine Plastic Sanitary Napkin Receptacle offers a simple, long-term solution that protects your plumbing infrastructure and keeps your restrooms pristine.

Engineered specifically for high-traffic commercial stalls, this sleek receptacle mounts directly to the wall to keep floor space completely clear. Setting it up is effortless: the main body pivots upward on side hinges to fully expose the mounting bracket, allowing your maintenance team to secure it to the wall in seconds.

Daily upkeep is just as seamless. Rather than fussing with separate removable inserts, staff simply lift the top lid to install a trash bag or clear out contents during routine rounds. When closed, the lid traps odors inside and keeps waste completely hidden from view, ensuring every guest enters a clean, hygienic stall. Compact, durable, and modern, it's an essential upgrade for any smart facility management strategy.

FEATURES

Lift-Up Cover: The main housing pivots upward to provide full access to the rear mounting holes for quick and easy wall installation.

Top-Opening Access: Smooth-opening lid enables fast waste removal without the need for a separate inner liner.

Compact Design: Slim profile fits comfortably in tight restroom stalls.

Odor & Waste Concealment: Traps odors and keeps waste out of sight.

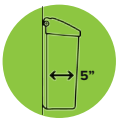

Built for Commercial Use: Interior plastic bin prevents leaks.

Ready Out of the Box: Comes complete with all necessary mounting hardware so you can protect your facility immediately.
