23-GALLON SQUARE TRASH CAN

Black
ALP477-9-23-BLK

Gray
ALP477-9-23-GRY

Some spaces just make more trash: the busy kitchen, the crowded break room, the lobby that sees steady traffic from open to close. A small can can't keep up, so you're swapping bags twice before lunch, the overflow piles up around the rim, and the mess spills onto the floor. The **Alpine 23-Gallon Square Trash Can** was built for those high-volume spots. Its generous 23-gallon capacity holds more between trips to the dumpster, while the square footprint tucks neatly into corners and sits flush against walls, giving you more room for waste without giving up more of your floor.

Underneath its clean, simple look is a can made to work hard. The tough polypropylene body stands up to the bumps and scrapes of daily use, won't rust or corrode like a metal can, and holds its shape in a wide range of environments without cracking or warping. It supports up to 79 lbs of waste, yet weighs just 5.0 lbs on its own, so it's easy to move, rinse out and reposition whenever your space changes.

Make it your own with a matching lid, each sold separately in the same black and grey finishes. The Alpine Push Lid adds a swinging door that keeps waste out of sight and helps contain odors while still letting you toss trash in with one hand. The Alpine Flap Lid gives you a clean, low-profile hinged cover for a tidy, finished look. Or leave the top open for the fastest disposal in high-traffic areas. Choose your color, pick your lid, and give your busiest spaces a can that can handle the load.

FEATURES

Large 23-Gallon Capacity: Holds more waste between emptyings, so high-traffic kitchens, break rooms and lobbies need fewer bag changes throughout the day.

Space-Saving Square Shape: The square footprint sits flush in corners and against walls, making better use of floor space than a round can of similar size.

Durable: Made of 100% polypropylene that stands up to daily use in busy homes and workplaces.

Matching Lid Options: Pairs with the Alpine Push Lid (ALP478-5) or Alpine Flap Lid (ALP478-6), sold separately in matching black or grey for a coordinated look.

Push Lid Option: A swinging door hides waste from view and helps contain odors, while still allowing quick, one-handed disposal.

Flap Lid Option: A low-profile hinged cover keeps contents out of sight and gives the can a clean, finished appearance.

Use It Open or Covered: Leave the top open for fast, simple disposal in busy areas, or add a lid when you want waste covered.

Durable Polypropylene Construction: Made of 100% polypropylene that stands up to daily wear in busy homes and workplaces.

Strong 79 lb Weight Capacity: Handles heavy loads of everyday waste without bowing or losing its shape.

Weather-Resistant: Holds up in a wide range of environments, indoors or out, without cracking or warping.

Corrosion-Resistant: Won't rust or corrode like a metal can, so it keeps its color and shape for years to come.

Lightweight and Easy to Clean: At just 5.0 lbs., it's easy to move, rinse out and reposition wherever you need it.

Two Color Options: Available in classic black or neutral grey to blend in with any décor.

Versatile Use: Ideal for offices, kitchens, restrooms, break rooms, classrooms, lobbies, retail stores and homes.

FEATURES

23
Gallon

OPEN OR COVERED
Keep it open for quick disposal, or add a lid to conceal waste and contain odors.

LIGHTWEIGHT
At just 5.0 lbs., it's easy to move, clean and reposition.

Available in two colors

MANAGABLE
Can be easily cleaned and sanitized.

STRONG WEIGHT CAPACITY
Supports up to about 79 lbs. of waste.

CORROSION RESISTANT
Won't rust or corrode like metal cans, so it keeps its look over time.
