## 36 Gallon Silver Trash Can with Dome Lid

Outfitting your outdoor spaces with long-lasting waste receptacles is crucial for maintaining cleanliness and reducing litter. Our Silver 36 Gallon Trash Can with Dome Lid excels in practicality while maintaining their durability and is your optimal solution. Boasting a spacious 36-gallon capacity, it accommodates high foot traffic and requires less frequent emptying, reducing worker strain for maintenance personnel. We've constructed the base with reinforced circular bands and rolled edges, creating it specifically to endure daily use in any climate. The four adjustable feet on the base and a central anchoring point will help establish a long-term, stable placement. Its included dome lid effectively shields against water and snow infiltration into the plastic liner. Each one also contains two retaining cables for added stability. These will help deter unauthorized access or tampering with the contents of the trash can by ensuring the lid cannot be easily removed. Suitable for parks, trails, fields, outdoor shopping malls, offices, and schools, our trash can feature a polyester powder coating that will provide a polished finish, as well as protection against vandalism and weather damage. Choosing our Silver 36 Gallon Trash Can with a Dome Lid ensures you have cleaner outdoor spaces and a wise investment in property maintenance.

### FEATURES

**Design:** To ensure longevity, we constructed the trash can base with reinforced circular bands and rolled edges.

**High-Capacity:** The 36-gallon holding capability requires less disposal by maintenance workers.

**Coating:** A polyester powder that provides superior coverage and a polished finish and detracts from vandals.

**Touch-Free:** This receptacle doesn't require physical touching; thus, the risk of cross-contamination is eliminated.

**Durable:** The fully welded lid fortifies its resilience to harsh temperatures and all-weather conditions.

**Lid:** It is specifically designed to help stop snow and rain from flooding your waste receptacles.

**Solidity:** The four adjustable feet with the central anchoring point help solidify a stable placement for the trash can.

**Safeguard:** With two included retaining cables for the dome lid, the risk of it falling off or vandalism is minimized.

**Safety:** The included hardware enables you to bolt your trash can in place to prevent theft or damage.

## FEATURES

### DOME LID

Designed to help stop snow and rain from flooding your waste receptacles.

### TOUCH-FREE

Doesn't require physical touching; thus, eliminating the risk of cross-contamination.

### COATING

Polyester powder that provides superior coverage with a polished finish, and detracts from vandals.

### RETAINING CABLES
