

Befour's HTR101 digital height rod features fast & accurate performance.

With its user-selectable 51" measurement span, the versatile HTR101 can measure the height of a small child to that of an NBA player. The smooth glide headpiece features one-button operation, bright LED digits that can be easily seen, even at maximum height, and a unique auto-hold function which retains the measurement display even as it is raised out of the way.

The HTR101 has an accuracy of ± 0.1 in (0.1 cm), easily converts between three display formats (inches, feet & inches or centimeters) and incorporates an automatic turn-off. The efficient battery system provides 10,000 height measurements on a single set of (2) "AAA" alkaline batteries (included).

With its seamless design and no visible wires, the HTR-101 is ideal for hospitals, clinics, educational institutions and fitness centers.

- Fast & accurate measurement
- View height in selectable formats
- Measures up to 91"
(7 ft 7 in / 230 cm)
- Effortless sliding headpiece
- Flexible measurement range
