

BLICKMAN

IV Stands

Optimal continuous fluid delivery

Includes:

- IV Stands
- IV Stand Accessories
- IV Irrigation Safety Systems

OUR MISSION

Customer Focus

Exceed customer expectations through a commitment to continuous improvement of our products and services.

Quality Products

Offer the marketplace a broad range of high quality, cost effective, and durable products of superior craftsmanship.

Organizational Excellence

Strive for excellence in all we do by fostering a participative, team based environment, which nurtures the active involvement of all members of the organization.

Marketplace Recognition

Earn the respect, admiration, and loyalty of our people, customers, and suppliers by treating them with dignity and respect, embracing diversity, and developing and maintaining long term partnerships.

Collaborative Workplace

Encourage all employees to work safely and efficiently, contribute innovative ideas, and personally benefit from the ongoing success of the company.

BLICKMAN

THE BLICKMAN DIFFERENCE

IV Stands

- Our IV poles are optimal for maintaining continuous fluid delivery for every patient, available in a wide range of adjustable heights with a variety of easy locking options that can be operated with one hand.
- Our IV poles are all available in high quality chrome and stainless steel, and set on 4, 5, or 6 leg bases with casters, no projections, and great balance/tip resistance. Some bases are gravity weighted to help compensate for heavier loads. All bases have the ability to spin 360° in tight spaces.
- Most of our models have 2-, 4-, 6- and 8-(rake) hook adapters available. All come with colored secure grip tips.

Key Product Features

*See page 9 for more details on all optional features

IV Stands

4 Leg

4 LEG CHROME IV STANDS

Description: We offer two 4-leg chrome IV stand models, one with a standard base, and one with a heavyweight base. Both base types include Wall Saver™ tips to protect against wall scuff marks. They both move on 2" plastic twin wheel hooded swivel casters and they both come standard with two hooks. A four hook removable adapter is available for model 1305.

IV Stands

6 Leg

6 LEG IV STANDS

Description: Our 6-leg IV stands are designed for hospital applications requiring heavier loads by using low center of gravity bases. They come in either a chrome or a stainless steel pole with a Tru-Loc™ height adjustment mechanism that allows the pole to reach a minimum of 52" high off the ground and a maximum of 90" off the ground. Our 6 leg IV stands come standard with 4-, 6-, and 8-(rake) removable hooks.

Features Include:

- ✓ 23 3/8" diameter base with low center of gravity for improved stability
- ✓ Heavy duty 3" roller blade swivel casters for easy maneuverability
- ✓ Steel powder coated finished base for durability (many colors available)
- ✓ Accommodates up to 4 infusion pumps and up to 8 IV solution bags while preventing tubing line entanglement

THE BLICKMAN DIFFERENCE

IV Irrigation Safety Systems

- Our IV Irrigation Safety Systems (IVTs) offer superior safety, efficiency, and financial value for fluid intensive IV irrigation procedures, such as arthroscopic, hysteroscopic, endoscopic, TURP, etc.
- They maintain continuous fluid delivery by offering infinitely adjustable heights for up to eight 3 liter or 5 liter IV bags on four independent channels.
- Their easy, one handed operation allows nurses to attach IV bags at comfortable heights, starting at 5 ft., and then raise bags up to 8 ft. (or to 9 ft. with custom extender) simply by pushing down on "squeeze/release" handles, an ergonomic solution that meets OSHA standards and greatly reduces the threat of back injuries.

Key Product Features

Up to eight 3 liter or 5 liter IV bags on four independent channels

High quality, easy maintenance, light weight aluminum

Locking casters for safe mobility and 360° spin in tight spaces

Push down "Squeeze/Release" handles to raise IV bags

Indefinite adjustable heights from 5 ft. to 8 ft. (9 ft. with custom extender)

26 1/2" diameter, inverted, 5 legged base resistant to tipping

WHY CHOOSE OUR IVT?

Safe:

- This ergonomic solution meets OSHA standards and greatly reduces the threat of back injuries with its one-handed operation which allows nurses to attach IV bags at comfortable heights, simply by pushing down on “squeeze/release” handles, an
- Hard anodized aluminum construction with stain resistant finishes makes it so that no surfaces can chip, flake, or rust to introduce particle matter into a sterile or surgical environment.
- The lowest positions are cushioned by shock absorbers, thus sparing the common banging known to occur with the standard IV poles, which results in tearing of bag tabs and spilling remaining fluids onto the O.R. floor.
- The steady, five-legged bases resist potential tipping hazards, eliminating the need for “sand bagging”.

Efficient:

- There are no electrical aspects that require overnight charging, so they are always ready, whenever you are ready.
- The ability to stagger heights of up to eight 3 liter or 5 liter bags ensures continuous flow of liquids, as it allows you to change an IV bag, while the other bags are still irrigating.
- Easy to clean and maintain
- Compact footprint frees up valuable space on the O.R. floor.

Affordable:

- Our IV Irrigation systems are value leaders among a few comparable models, saving you up to **\$50/procedure** on IV tubes vs. those required with far more expensive, pump driven systems.

Irrigation Systems

IVTs

Description: We offer two types of IVTs, one with 2 hooks, which holds up to 4 IV bags and one with 4 hooks, which holds up to 8 IV bags. Hooks can raise and lower from 67" to 81". They travel on black plastic twin wheel hooded swivel casters. Both IVTs come with 26 1/2" diameter inverted, 5 leg base.

Our IVT stands have the same dimensions:

Width: 12 3/4" x Height: 89" x Depth: 12 3/4"

Note: these dimensions do not include the base
