## Devon™ Surgical Site Mini-Markers

Some traditional skin markers, when used in conjunction with alcohol based prepping agents, can wash off rendering the site mark difficult to read. Devon™ Surgical Site Mini-Marker Prep Resistant product resists wash off after standard skin preparation and draping.

### The Joint Commission, Universal Protocol for Preventing Wrong Site, Wrong Procedure, and Wrong Person Surgery™\* states<sup>1</sup>:

- Mark the site before the procedure is performed.
- The mark is sufficiently permanent to be visible after skin preparation and draping.
- During the Time-Out, team members agree, at a minimum, on the following:
  - Correct patient identity
  - Correct site
  - Procedure to be done

- Single patient use prevents cross contamination
- Mark remains visible after scrubbing with common antiseptics, including alcohol based prep agents
- Designed to minimize waste
- Non-smearing, non-toxic ink formulation
- Non-sterile for use prior to the sterile field
- Clear, bulk packaging for accessibility in the pre-operative setting

## Devon™ Surgical Site Mini-Markers

*Covidien recognizes the heightened awareness and concern for patient safety and the prevention of medical errors in the operating room. To assist caregivers in implementing a surgical site marking process, Covidien is introducing a new offering of skin markers for the preoperative setting.*
