

## Baseline® digit goniometer

**use only one hand to measure your patient!**

- measures 110° flexion through 40° hyperextension in 2° increments on plastic model (5° increments on metal model)
- arm has 10 cm/4" scale
- use your finger to move the measurement head through flexion, extension and hyperextension
- readings can be taken using only one hand; freeing the therapist's other hand to stabilize the patient during measurement or to record the measurement; the standard finger goniometer requires two hands to make a finger ROM measurement

### stainless steel digit goniometer

12-1016	stainless steel digit goniometer, each	40.00
12-1016-25	stainless steel digit goniometer, 25 each	900.00

### plastic digit goniometer

12-1014	plastic (black) digit goniometer, each	30.00
12-1014-25	plastic (black) digit goniometer, 25 each	675.00

## Baseline® 180° finger (small joint) goniometer

- stainless steel goniometer measures ROM of finger joints (metacarpophalangeal and interphalangeal) and other small joints including toes
- head has opposing 150° scales in 5° increments
- linear scale in cm and inches
- deluxe model has larger head and full 180° range

	each		25 each		
12-1010	standard finger, 6"	37.50	12-1010-25	standard finger, 6"	842.50
12-1011	deluxe finger, 6"	40.00	12-1011-25	deluxe finger, 6"	900.00
12-1015	small finger, 3 1/2"	35.00	12-1015-25	small finger, 3 1/2"	787.50

## Baseline® finger flexion gauge

- clear plastic gauge simplifies and speeds measurement of composite finger flexion and finger-thumb opposition
- scale measures up to 10 cm

12-1060	finger flexion gauge	15.00
