

WE'RE THE COMPANY THAT BRINGS YOU MIKE...

AND MIKE BRINGS YOU THE PRESSURE FIT RAIL SYSTEM

Introducing, the unique and portable Prism Medical Pressure Fit System. The Pressure Fit System is our newest in temporary ceiling lift solutions. The vast array of track designs offers all of the benefits of standard ceiling lifts with no attachment to structure required. Minimal installation is required because the system works by exerting equal pressure between the floor and ceiling to stabilize the unit. Constructed of high strength aluminum with a 440 lb. weight capacity, the Pressure Fit is suitable for many situations. Our unique patent pending one step height adjustment allows for set up in just minutes and the incorporated level and pressure gauge indicator allow for easy and accurate installation.
