

ERG 911 S

A high-performance medical bicycle ergometer

A new generation of medical bicycle ergometer

The **SCHILLER ERG 911 S** is a state-of-the-art, high-performance medical bicycle ergometer designed to meet the highest quality standards for stress testing. It provides accurate assessments for cardiovascular and pulmonary function diagnosis while offering exceptionally quiet operation, modern aesthetics, and minimal maintenance requirements.

APPLICATION AREAS

Developed based on proven previous models, the **ERG 911 S** is ideal for use in:

- Cardiology practices
- Clinics
- Therapy and rehabilitation centers

Designed for stability and practicality, this ergometer facilitates defined exercises for ergometric examinations and therapeutic applications.

KEY FEATURES

- Seamless Compatibility: Works with all **SCHILLER** exercise ECG devices
- Enhanced Display: Large, pivoting 180° graphical screen for better visibility
- Versatile Connectivity: RS-232 interface ensures compatibility with most cardiac and pulmonary stress testing systems
- Whisper-Quiet Operation: Almost noiseless drive system
- Durable and Stylish: Robust steel construction with a modern design
- Precision Performance: Speed-independent load for consistent results
- Hygienic and Easy to Maintain: Special surface coating for effortless cleaning
- Maximum Saddle and Handlebar Heights adjustability: Customizable for patient comfort and ergonomic support
- Optional Blood Pressure Monitoring: Integrated measurement capability for enhanced diagnostics
- High Load Accuracy: Ensures precise resistance settings for reliable stress testing

ADVANTAGES

- Exceptional Durability: High-quality manufacturing ensures long-lasting performance
- User-Friendly Design: Comfortable mounting and dismounting
- Resilient Casing: Acrylic-coated, easy-to-clean surface
- Outstanding Value: Excellent price-performance ratio
- Maintenance-Free Drive: Reliable, hassle-free operation
- Smooth Pedaling Experience: Ensures a comfortable ride
- Accessible for All: Low-frame design allows easy use, even for elderly or handicapped patients
- Customizable Workouts: Easily programmable ergometry parameters
- Compact and Sturdy Build: Supports patient weights up to 352 lbs. with a stable steel tube construction

WHY CHOOSE SCHILLER ERGOMETRY DEVICES?

SCHILLER is a global leader in developing high-precision medical diagnostic devices, trusted by cardiologists, hospitals, and rehabilitation centers worldwide. Here's why **SCHILLER** ergometry solutions stand out:

- Reliability: Maintenance-free operation with cutting-edge technology.
- Patient Comfort: Ergonomic design prioritizes the patient experience.
- Versatility: Compatible with a wide range of diagnostic and monitoring systems.

The **SCHILLER ERG 911 S** is the ultimate solution for precise and comfortable stress testing, ensuring accuracy, ease of use, and long-term reliability.
